

**Lawrence Livermore National Laboratory  
Environmental Policy**

Over the last two decades, LLNL has made great strides in improving our environmental performance and we have actively taken steps to reduce any potential impacts the Laboratory's operations might have on our environment and the community. To further these efforts, LLNL is committed to the implementation of a strong Environmental Management System through our Integrated Safety Management System. The next step in support of this commitment is the issuance of a revised comprehensive environmental policy. This policy is described below and is effective immediately.

---

Lawrence Livermore National Laboratory (LLNL) is committed to providing responsible stewardship of the environmental resources in our care. Environmental stewardship is integrated into our strategic planning and decision-making processes and into the management of our work activities through the Integrated Safety Management System.

In support of this policy, LLNL commits to:

- Work to continuously improve the efficient and effective performance of our environmental management system;
- Comply with applicable environmental laws and regulations;
- Incorporate pollution prevention, waste minimization, and resource conservation into our planning and decision making processes;
- Ensure that interactions with our regulators, DOE, and our community are based upon integrity, openness, and adherence to national security requirements;
- Establish appropriate environmental objectives and performance indicators to guide these efforts and measure our progress.
